

File Harbor Cabinets

File Harbor Cabinets — Universally Valuable *A safe harbor for confidential files.*

File Harbor is a unique and universal cabinet, ideal for filing and storage. The cabinets are distinguished by locking tambour doors that secure interior contents, while lending an entirely distinctive look. The horizontal doors recede into the cabinet keeping aisles clear and freeing up space. In fact, users gain approximately 6 sq. ft. of valuable floor space each time a File Harbor Cabinet replaces an existing 42"-wide lateral file.

Offered in three standard heights and widths, the File Harbor Cabinets are secure, space-saving filing solutions for any organization.

PULL OUT REFERENCE SHELF

ROLL OUT DRAWER

File Harbor Cabinets A better solution for filing and storage.

1. Save budgets while saving up to one-half the space used by drawer files.

File Harbor Cabinets deliver a lower cost-per-filing inch than vertical or lateral drawer files. The clean, functional, secure design keeps aisles clear and frees up more space than conventional drawer files.

2. Gain efficiencies.

The horizontally receding tambour doors enable complete access to all files, making end-tab filing quicker and resulting in fewer misfiles. File Harbor holds 200 lbs. per shelf and shelves adjust at 1" high increments. The cabinets are also ideal for personal workstation storage, helping to define space while providing privacy.

3. Create unique variations.

File Harbor Cabinets are available with preconfigured components for end-tab filing, but users can also specify unique storage variations using optional reference shelves and optional rollout and hanging file frames. Select cabinet heights at 83", 62", or 38", and from three widths 48", 42" or 36".

4. Choose door colors that complement.

File Harbor Cabinets are available in all Safco® standard paint finishes. Tambour doors available in Pebble Gray, Mist, Graphite, and Sand. All internal components are standard Graphite finish.

accommodating

Multiple storage configuration options accommodate a variety of media to support unique needs.

space planning

Safco® offers free, expert high-density storage design services. We recommend the best solutions for the needs and space, develop drawings for floor plans, and provide a list of all the materials needed to create an effective storage solution.
